

For the world fast moving construction we are introducing a new product, ZOLTAQ fast ready mix

For the last few years construction world are looking for an alternative for pure graded river sand ,but the availability of river sand is few in india. Transportations of river sand to various state is also not possible. To overcome this crisis, we are introducing a new product called ZOLTAQ fast ready mix.

ZOLTAQ ready mix we are manufacturing this product using most popular quality cement in south india.

We are manufacturing our product under the supervision of senior chemical engineers.

The whole process is taken by automatic machineries according to its weight . There by the quality of the product is assured.

Our product are packed with 50 kg of water protect polythene bags. That make the product easy to handle, easy to store.

We will also prepare the ratio which Engineer's ask.

FACTORY ADDRESS: BUILD BUDDY, SURVEY NO. 58, THENKULIPADI VILLAGE, GURPUR TALUK, MANGALORE - 574 145

SMOOTH PLASTER QUALITY & DURABILITY An ISO Certified Company

BENEFITS

COMPACT PLASTER, REDUCE VOID GAPS

HIGH QUALITY, EASY STORAGE

EXCELLENT WORKABILITY & MINIMIZATION OF LOSSES

HIGHER PRODUCTIVITY, SAVES TIME & REDUCE COSTS

EASY TO APPLY & NO WASTAGE

Quality products

Ready mix is mixed in a controlled environment, which means it is measured precisely and blended together with the best materials available.

Fast construction

Buying ready mix means there's no fuss, once your product has been delivered, you can begin construction immediately. Whether you're building a bridge, walls, flooring, stepping stones or a dog kennel – ready mixed concrete allows you to speed up the process because it has already been mixed.

Zero waste

Ready mix is made to meet your exact requirements, so there's zero waste. When a concrete structure is demolished, it can be ground and recycled into small aggregates, which can be put to use elsewhere – such as laying new foundations and backfill.

Reduced dust pollution

As ready mix is pre-mixed and delivered to you onsite, dust pollution is reduced because the concrete mix is already wet and dust is managed responsibly during manufacture in batching plants.

Reasonable prices

Instead of buying all of the individual elements that combine to make concrete, you can purchase the finished product at a lower cost. Concrete suppliers will buy in bulk and, therefore, can offer reasonable prices.

Time saving

By turning to professionals who can mix, supply and deliver means you can save yourself time because you won't have to erect and dismantle the equipment needed to make the concrete. Instead you can order your concrete, arrange a delivery date and time, and get on with your project on the day of arrival.

PLASTERING | BLOCK JOINTING | CEILING | TILES ADHESIVE

COMPARISON CHART

DESCRIPTION	CONVENTIONAL PLASTER	READY MIX PLASTER
MAN POWER	Practically high	Low (since it is reduce to use material)
COVERAGE	0.35 Kg /sqft/mm	0.2 kg /sqft/mm
MIXING	Difficult	Easy
QUALITY	Irregular	Consistent
RAW MATERIAL	Inconsistent	Uniform (since raw materials are processed carefully)
WATER PERMEABILITY	High	Low

METHOD OF USAGE

Add water in the ratio of 13% -18 %

Take zoltaq ready mix

Mix with water

Apply

INGREDIENTS:

- PURE GRADED RIVER SAND
- MOST POPULAR QUALITY CEMENT IN SOUTH INDIA
